Drag-and-Drop Reports
Many Chart Types
Powerful Calculations

Define calculated member formula

\[
[\text{Measures}].[\text{Average resolution days}] = \begin{cases} 
\text{CASE} \\
\text{WHEN} \\
[\text{Measures}].[\text{Issues resolved}] > 0 \\
\text{THEN} \\
[\text{Measures}].[\text{Total resolution days}] / [\text{Measures}].[\text{Issues resolved}] \\
\text{END} 
\end{cases}
\]

Operators
+ - * / ( )
and or not < <=
= >= > <>

Member functions
.CurrentMember .PrevMember
ParallelPeriod

Set functions
.Members .Children Descendants
Filter

Aggregators
Count Sum Avg Median

Formatting #,###.## Decimal

Read calculated members tutorial to learn about calculated member formulas. You can select members, operators and frequently used functions from sidebar to insert them into calculated member formula.

</table>

Sample Sprint velocity chart

Track the amount of work committed and completed from sprint to sprint in the selected project. The report shows only closed sprints with committed story points.

Demo 004

Sprint Story Points committed
